

Do you want to drastically  
reduce the cost  
of communications?

Do you want to save  
about 60% of the costs  
of roaming?

**Voip IT**  
IT'S YOUR CALL

Do you want to maintain  
the quality of the calls  
here and in China?

Do you want to upgrade  
your telecommunications  
system without paying  
more for it?

## WHO WE ARE

VoIP-it's main objective since 2008 has been to become a benchmark VoIP operator. We are highly focussed on internationalisation and aim to provide innovative solutions and telecommunications services specially adapted to your company that contribute towards optimizing the use of your infrastructures and reduce your costs.

We are a creative, open minded company that pays close attention to the market and focuses on end users. We always strive to be innovative when we design our solutions. We mainly work with “open source” technologies and have an experienced engineering team covering the different telecommunications areas.

This combination means your company has an ideal telecommunications partner in VoIP-IT.

- **ANACOM\* licence as VoIP operator**
- **Operator with its own nomadic numbering (30)**
- **ITSP (Internet telephony service providers)**
- **Engineers Certified by Digium, dCAP (Digium Certified Asterisk Professional)**
- **Experience in international telecommunications projects**
- **Telecommunications consultants**

with no installation costs

## CALL IT REMOTE

Multi-platform telecommunications  
from thousands of miles away

## CALL IT DATA

Unlimited wireless for up to 5 devices  
at once

## USING YOUR MOBILE TO MAKE CALLS WHEN YOU ARE TRAVELLING IS A BASIC NEED.

CallIT Travel is a service you can use when you are travelling outside your country, allowing you to cut voice communication costs by up to 60%.

The solution consists of installing an app on your Smartphone. It works on the call-back principle transforming a call you are making into a received call while maintaining your mobile phone number and the call quality, and being fully integrated with your contacts list.

This service can be optimised by using local SIM cards, thus avoiding roaming charges.

IT TRAVEL

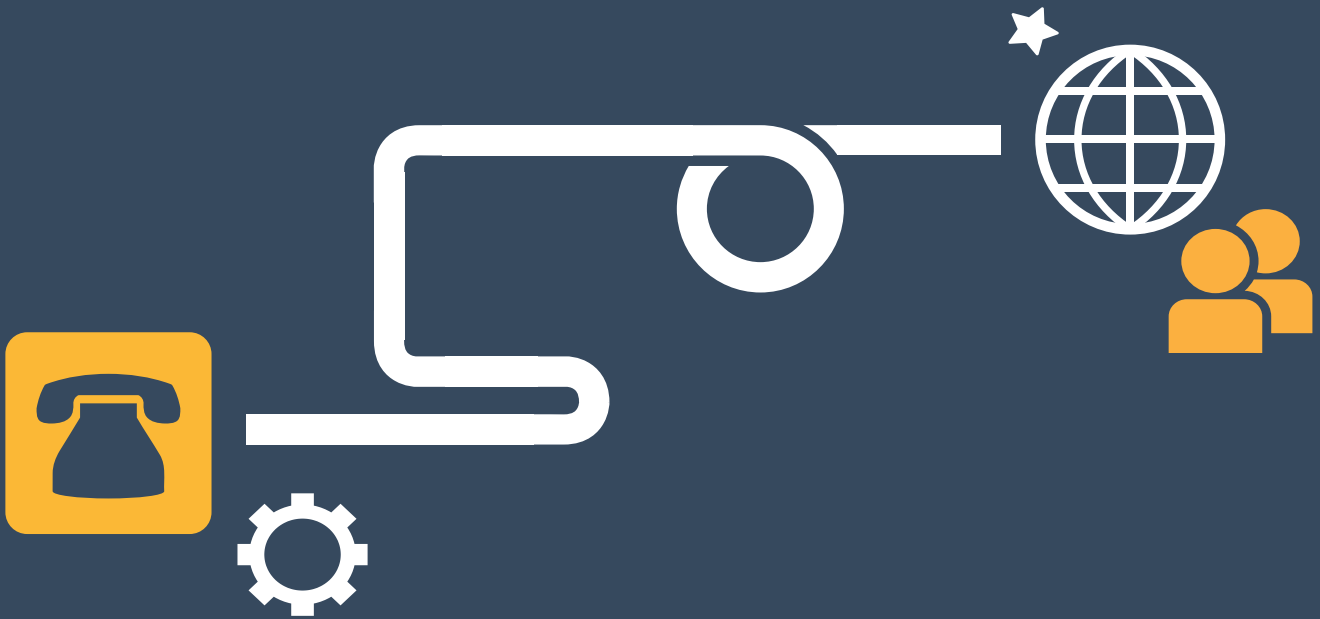

# CALL IT OUT

**THIS SOLUTION ALLOWS YOU TO MAKE AND RECEIVE CALLS TO AND FROM ANY NUMBER ENJOYING THE VoIP-IT STANDARD RATES.**

CallIT OUT is a new generation IP access to the public phone network similar to digital access (Primary and Basic Rate ISDN) able to handle more than 30 calls at the same time.

It works by configuring a SIP account in an existing IPPBX or through a SIP gateway installed by VoIP-IT.

Each access can have up to 100 nomadic IDD's in blocks of 10, the new numbering that works anywhere in the world!

IT OUT

# CALL IT OFFICE

**THIS SOLUTION CONSISTS OF AN INTEGRATED IP TELEPHONE EXCHANGE ADAPTED TO YOUR COMPANY'S COMMUNICATION NEEDS.**

It can be a complete IP solution or it can be interconnected with your current infrastructure, allowing you to migrate to the IP world gradually.

Furthermore, this solution involves several different features:

- Call-recording module
- Conference calls
- Voice Mail to Email
- Virtual telephonist
- Answering hours
- Fax to email
- Unlimited number of extensions
- No licences required

IT OFFICE

# CALL IT REMOTE

IF YOUR BUSINESS IS NOT STATIC,  
YOUR TELECOMMUNICATIONS SHOULDN'T  
BE EITHER.

With CallIT Remote, you can take your fixed extension wherever you go, allowing you to make and receive calls just like if you were in your office.

This multi-platform product can be used in Laptops, Smartphones, Tablets, and the fixed phone.
